POLLY

PRODUCT AND PRICING **ENGINE (PPE)**

Mortgage pricing, revolutionized.

Polly's cloud-native, API-first PPE was built with patent-pending tech to solve the core limitations of legacy engines and facilitate an unlimited amount of configurability, flexibility, and granularity across all loan pricing and lock processes.

The next-generation engine delivers the industry's strongest ROI and value through improved margins, end-to-end automation, and unparalleled features and functionality.

Leading mortgage lenders and banks leverage Polly's next-gen pricing engine to:

- Configure products, pricing, margins, and eligibility with an unlimited amount of parameters, including custom parameters
- Create end-to-end automation between the LO/broker and capital markets/lock desk
- Revolutionize the LO experience through full mobile capabilities, scenario comparison, rate alerts, and a fully configurable and intuitive experience
- Elevate their brand using white-label customization
- Access the most cutting-edge technology and innovation, including the industry's first AI copilot for LOs

3-5 HOURS SAVED DAILY
with product config and ongoing maintenance

79% REDUCTION
in manual lock desk workflows

INCREASE BPS
maximize monthly gain-on-sale when used with Polly Exchange

OMNICHANNEL
on-the-go experience for loan officers

> Back in the second half of last year, we knew the mortgage industry was in for a challenge. I was asking myself: '*How can we maximize our responsiveness? How can we be creative and position ourselves for success in an incredibly challenging market?*' As a sales-focused organization, I knew we needed a sharp PPE to enable us to act decisively and with precision, which is ultimately what led us to Polly.

The user experience

Intuitive, high-performance tools create ultimate transparency, streamline workflows, and enable users to price, compare, and even save scenarios in a matter of seconds.

Margin management

Irreplicable, patent-pending technology delivers the most granular margin management, with near-infinite dimensions and unlimited flexibility and configurability.

Version control

Know the exact day-one and historical details of each and every loan in the pipeline, including margins, LLPAs, guidelines, and more.

Rule configuration/management

Highly configurable eligibility strategies can be created in a single-view eligibility matrix with as many parameters as needed.

Lock desk automation

Automated, fully flexible lock desk workflows including initial locks, extensions, re-locks, re-prices, price exceptions, float downs, and more.

Advanced pipeline monitoring

Native pipeline monitoring proactively detects and alerts of any loan-level change in circumstance or better rate, empowering internal teams to take quick action.

Competitive, actionable analytics

Make strategic and informed decisions in real time using cross-functional, correlated mortgage market, enterprise, and private data.

Real-time API integrations

Create a unified borrower experience with seamless integrations to leading technology providers via flexible, robust APIs.
