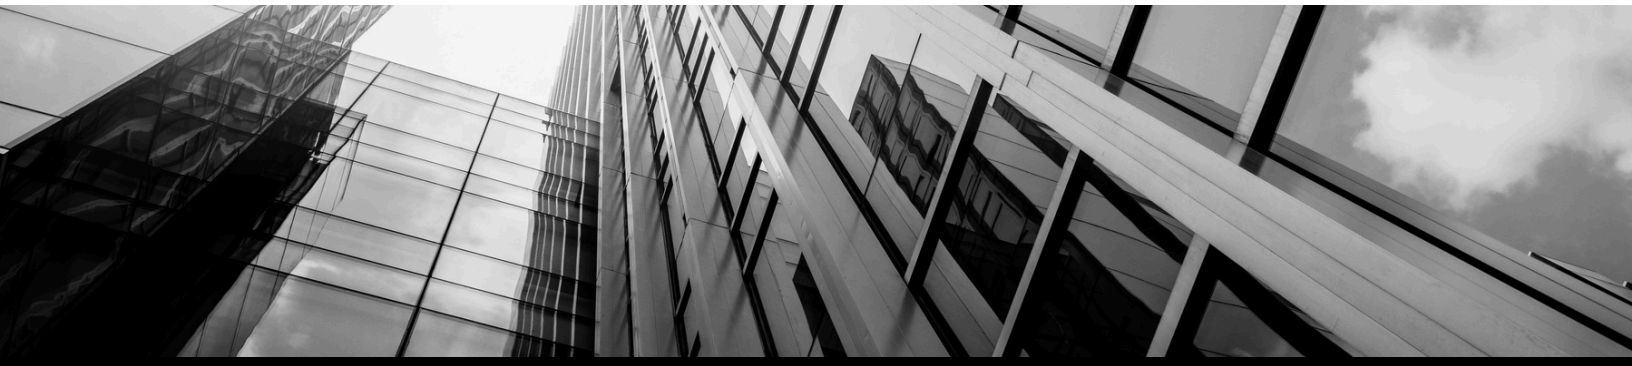
POLLY



LENDER
API LIBRARY

Polly's API-first strategy and architecture facilitate lenders' ability to meet borrower demand at the immediate point of need, from showcasing real-time mortgage rates on demand to proactively engaging borrowers with unique and tailored offers, to accommodating activities needed post-lock. Leading partners, lenders, and investors use our comprehensive library of APIs to embed the power of Polly's platform and unrivaled functionality directly into their applications, creating a seamless and intuitive experience across the borrower journey.

Scenario Pricing API

Deploy the power of Polly's PPE to deliver accurate, data-driven pricing decisions, all directly within their branded experience or retail marketing site.

- Loan-by-loan pricing comparison at current prevailing rate
- Display and run real-time pricing directly from marketing website
- Integrate with CRM to identify opportunities that drive bottom-line revenue
- Integrate accurate pricing into proprietary systems (in-house LOS, POS, etc.)
- Supports both historical and current market pricing

Batch Processing API

Proactively monitor and analyze loan pipeline pricing to identify opportunities to recapture business and re-engage existing clients.

- Monitor and manage servicing assets for lead recapture
- Create trust and a better overall borrower experience with existing clients
- Point-in-time API can be run at any frequency desired or required by lenders' unique business processes

Extensible API

This API supports all key functionality related to loan management and lock desk processes, from the initial rate lock through any post-lock actions.

- Attain consistent pricing and lock actions across the mortgage tech stack
- Supports a reprice, lock extensions, product changes, price exceptions, relocks, cancellations, and float requests
- Support worse case pricing and historical searches

Webhooks save valuable time and further increase operational efficiencies by intuitively delivering real-time notifications of any lock and/or loan changes, including but not limited to reprice, lock requests, lock extensions, concessions, product changes, price exceptions, relocks, and more.
