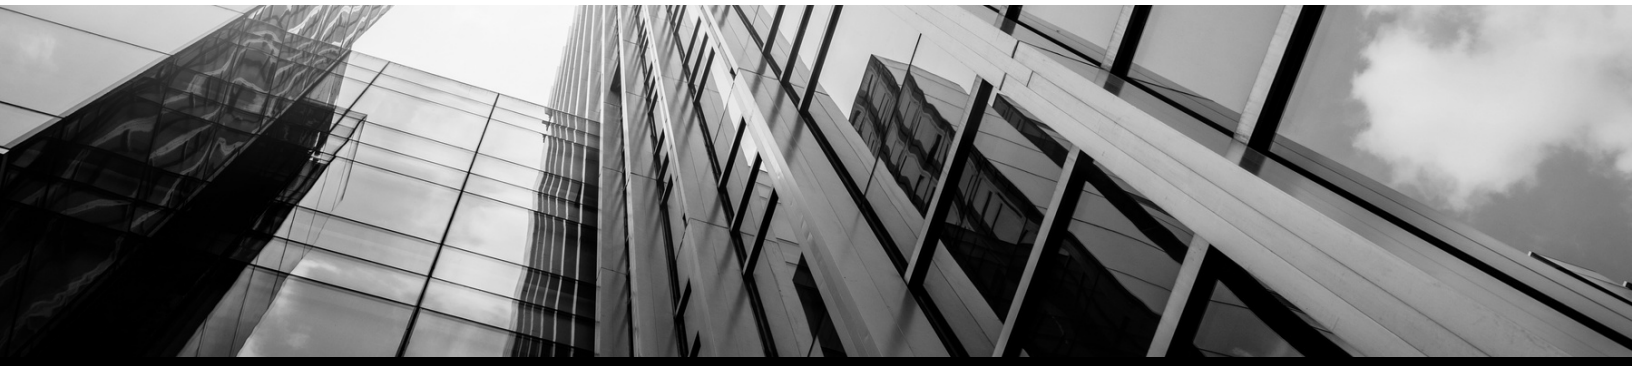
POLLY

Product Availability: Coming in 2025



INVESTOR DISCOVERY **PREMIUM**

When utilizing Polly's next-gen pricing engine in tandem with Investor Discovery Premium, correspondent buyers gain access to the mortgage industry's first automated market maker. Advanced, real-time pricing via APIs eliminate the dependency on static rate sheets and manual workflows, allowing internal teams to focus valuable time and resources on optimizing their execution strategies and competitive position.

Value and ROI:

- First-to-market best efforts automation and mandatory bid desk automation
- APIs eliminate rate sheets and manual data delivery
- Real-time, mark-to-market pricing
- Self-managed configuration using an unlimited amount of parameters
- Unrivaled buy side and sell side experience

Market purpose:

Polly is committed to pioneering the most innovative products in the industry, and delivering demonstrable value to mortgage industry participants. Investor Discovery Premium goes beyond rate sheet display, leveraging advanced APIs to facilitate investor-specific automation and drive better unit economics.

Eliminate rate sheets

Polly's advanced APIs enable correspondent buyers to eliminate the dependency on rate sheets and manual data delivery, if they choose. Buyers that continue to use rate sheets still benefit from unrivaled automation and efficiency gains.

Mark-to-market pricing

Increase transparency, agility, and overall control with live mark-to-market pricing. Not only does this approach provide a more realistic and accurate valuation, but it ensures your organization is prepared and at the forefront of any market shifts.

Real-time, granular pricing

Gone are the days of static rate sheet pricing that immediately becomes outdated and stale. With Polly, users can price with unlimited flexibility and granularity based on EPOs, turn times, number of conditions per customer, and much more.

Game-changing automation

Automate your customers' locks that use best efforts, including all data delivered via API to your correspondent portal and LOS. Power and automate the mandatory bid desk by facilitating the return of loan-level pricing to each correspondent seller in less than one second.

The user experience

Organize bid tapes from all sources into a single data dictionary. Users can seamlessly set bids, limit orders, place bulk orders, analyze performance, and leverage action-oriented insights within their full-service experience.
