
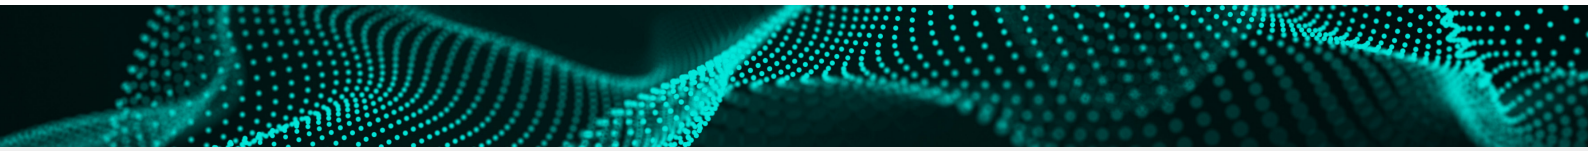
The Loan Store Partners with Polly and MOZAIQ to Streamline Workflows, Drive Mortgage Automation, and Accelerate Profitability

/ COMPANY PROFILE

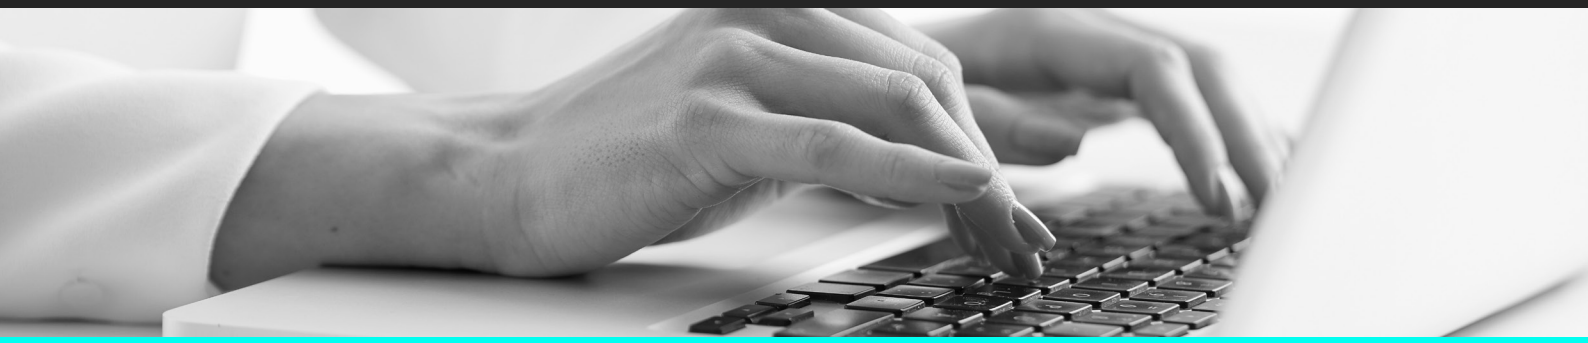
Established in 2019 in Tucson, AZ., The Loan Store is a wholesale mortgage lender on a mission to simplify the loan approval process and deliver consistently competitive pricing to its ecosystem of broker partners. With decades of experience, it offers a wide range of mortgage options, including Conventional, High-Balance, Jumbo Adjustable-rate, VA, and Non-QM. These options are competitively priced, enabling brokers to remain competitive in any rate environment.



/ OVERVIEW

The Loan Store has experienced rapid growth within its network of mortgage brokers. This acceleration pushed the executive team to seek out a robust technical infrastructure that could not only support the company as it scaled, but also meet and exceed their brokers' demands for an efficient, high-quality service.

That's where Polly's cloud-native, mobile-responsive technology came into play, delivering an intuitive, comprehensive solution that seamlessly integrated with The Loan Store's existing technology stack. Accompanied by the intelligent mortgage automation platform from MOZAIQ, The Loan Store was able to reach unprecedented levels of speed, efficiency, and service delivery.



/ RESULTS

- **Reduced manual touch by 80% using sophisticated back-office automation**
- **Decreased aggregator and GSE delivery times by approximately 20%**
- **Accelerated the loan lifecycle to drive profitability**
- **Shifted focus from time-consuming administrative tasks to ROI-generating initiatives**

/ THE DETAILS

Powering new workflows with modern technology

The Loan Store's mission is crystal clear: to offer commoditized mortgage products to its broker network in the most efficient and cost-effective way possible. The company aims to deliver a five-star broker service with the industry's fastest turnaround times. This goal presented a significant need for back-end technology infrastructure that was sleek, powerful, and effective.

A modern architecture, clean and intuitive user interface, and superior built-in functional depth were of top priority. Recognizing that other solution providers delivered a cumbersome, complicated UI and comparatively limited feature set, The Loan Store turned to Polly's Product and Pricing Engine (PPE) and Loan Trading Exchange solutions.

Flexible automation plays an integral role in both solutions, aligning with The Loan Store's dedication to delivering unparalleled efficiency. Since implementing Polly's PPE, the company has successfully automated many of its back-office functions, decreasing human touch time by 80% and streamlining processes to sizeably reduce manual lock desk workflows. These advancements have further empowered The Loan Store to remain agile and quickly distribute pricing across all channels.

Similarly, the Loan Trading Exchange has automated its entire post-sale commit process and incorporated multiple workflow automation features. These enhanced capabilities significantly improved execution, transparency, and efficiency across the entire loan sale and settlement cycle.

"The configurability and flexibility of Polly's solutions and the simplicity of the UI have all been a huge advantage to our teams," explained

Jag Chopra, Chief Operating Officer at The Loan Store. "It is now substantially easier for us to pull the data we need to accurately price out loans and generate disclosures. From an operational perspective, Polly has delivered exactly what we were looking for, if not more."

In addition to enabling staff to focus on achieving higher ROI, the automation infusion has relieved multiple pain points within the mortgage process that have traditionally burdened brokers.

While operations were already showing significant improvement, a turning point was on the horizon. Enter MOZAIQ: the intelligent mortgage automation company with a rapidly deployable, scalable automation platform and long-standing technology partner to Polly. By integrating Robotic Process Automation (RPA), Intelligent Data Processing (IDP), and web automation into its processes, The Loan Store took its efficiencies to an entirely new level.

Speed and efficiency assured

For The Loan Store, the use of RPA has resulted in significant time and cost savings. "From an automation standpoint, we have experienced hard cost savings. My team no longer has to deliver files right to the aggregator or the GSE," said Chopra. "Instead of doing 30-45 minutes of work, they can do 5-10 minutes of prep and the MOZAIQ bot can finish the rest of the process in full. That means we can do more with less."

Brandi Shoemaker, Chief Business Officer at MOZAIQ, added: "Automation fits really well given that The Loan Store's directive is to enable efficient and streamlined processes. This solution delivers simple, repeatable tasks over and over again, operating 24/7 when the human element is unavailable. There is an array of applicable solutions in the mortgage

lifecycle, and it's critical to the lender that these processes be completed the same way each and every time."

The 24/7 nature of automation was particularly attractive to The Loan Store, as this is what enabled it to compress the loan lifecycle. "Because the bots are still running overnight, the whole lifecycle of a loan is accelerated, which makes us more profitable," Chopra adds. "Fewer loans sit on warehouse lines, we don't have to do lock extensions, and borrowers have more time to consider their deal because the loan flies through our system. This supplements the day-to-day time savings and efficiency enhancements delivered by Polly's technology, all of which highlights the value that the two companies provide together."

In addition to operational improvements, Polly and MOZAIQ's cocktail of automation has also positively impacted the employee experience for The Loan Store's team. It has allowed them to shift their focus from time-consuming, administrative tasks to more strategic and ROI-generating initiatives, as well as better serve and support their broker partners.

"Our team has fully embraced the technology. It has become ingrained in our culture, largely because we've freed our people up to have more meaningful communication and interaction with clients. All the busy work is now

automated, giving our people more time to focus on the activities that deliver real value," added Chopra.

Looking ahead

The partnership with Polly and MOZAIQ has been such a success that The Loan Store is already considering other ways to augment its processes and integrate additional automation capabilities. One example is in loan setup, specifically data extraction from the documents uploaded by brokers at the start of the loan process.

Polly has actively supported The Loan Store's individual needs by deploying multiple new feature enhancements throughout their partnership, including a Debt Service Coverage Ratio (DSCR) non-QM product designed for experienced real estate investors. This highlights the seamless technology integrations that Polly can deliver via its cloud-native, high-performance infrastructure, as well as the value-added nature of the partnership. This success was driven by Polly's dedication to building strong relationships with their customers and partners – at both the customer service and technology levels – to deliver consistent and impactful innovation that drives ROI and long-term business success.

"It's really been a pleasure working with the Polly team. As rates increase and it becomes more of a purchase market, we're already looking at expanding products and Polly has been very good at facilitating that and meeting our evolving needs. The support Polly has provided has been exemplary. We've been really happy with the relationship and are excited about where we can go next," concluded Chopra.

"At Polly, we are obsessed with our customers' ongoing happiness and success. Our ethos is to be a true partner to customers rather than just a technology provider, something that the MOZAIQ team also embodies," said Adam Carmel, Founder and CEO of Polly. "We are beyond proud that our laser focus on innovation, technical excellence, and collaboration has helped The Loan Store deliver significant value to brokers amidst a challenging market landscape. Here's to the next step on the journey."
