POLLY/

Automated Delivery

Overview And Benefits

The average cost to originate loan industry wide is approximately **$8,000.** Polly wants to bring that cost down through automation and leveraging multiple technologies.

Challenges Associated with the Delivery Process

- Entirely manual
- Impossible to scale up and down without hiring and firing
- Requires complex training
- Difficult to maintain desktop procedures
- Only can occur during work hours
- Each investor has a unique delivery process

Polly's solution

Our automated delivery solution allows for an accordian digital workforce

- Scale Bots (digital workers) up/down based on volume
- Ability to scale rapidly and in real time
- No training required
- Training cost and physical office cost is eliminated
- Add new investors quickly and seamlessly

Create Operational Efficiency

- Improved turn times (Bots work 24/7, including weekends and holidays)
- Repeatable process eliminates human error
- Full audit trail for each step in the process

Move from Fixed Cost FTE model to Transaction Cost Digital Worker (Bot) Model

What is RPA

Robotic process automation (RPA) is technology that makes it easy to build, deploy, and manage software robots that emulate human actions while interacting with digital systems and other software. Just like people, software robots can do things like understand what's on a screen, complete the right keystrokes, navigate systems, identify and extract data, and perform a wide range of defined actions including sending emails and logging into secure websites. Bots can do tasks normally managed by humans in a faster and more consistent manner.

What tasks can the Bot do

- Stack documents
- Check for necessary data and files
- Flag loans with missing data
- Perform ULDD edits
- Connect to investor portals
- Email warehouse lines

Savings

Per transaction fee vs. FTE model

50%

Up to 50% cost savings over manual processes

An average of 45 minutes saved per file
